Model 06 and 08 Twin Head Automatic Weighing Machines

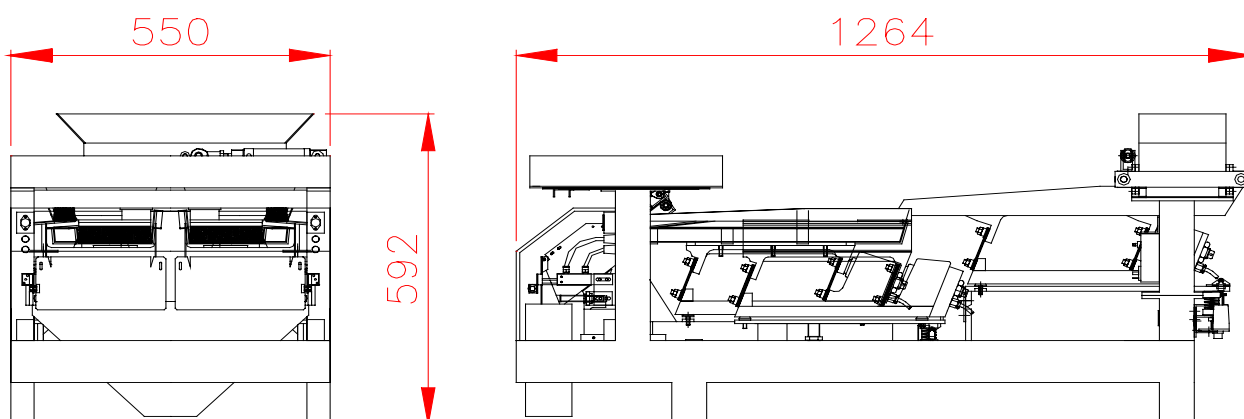

The Model 06 and 08 are extremely compact weigh counting machines intended for higher speed applications, and feature two completely independent feed systems and weigh heads with an integrated control system housed in a common framework.

The machines are specifically designed for small volume packs of lightweight components such as cable ferrules, crimp connectors, small screws and fasteners, small plastic mouldings and similar items typically up to a maximum length of 50mm.

The 06 and 08 machines are identical in operation apart from different capacity feed systems with alternative weight ranges enabling them to cover a wide range of applications.

The machines are controlled by a sophisticated Siemens PLC based control system which utilises a touch screen display for data entry and menu storage of product set up parameters.

The Model 06 and 08 machines are capable of up to 20 discharges per minute and are ideal for use with an Automatic Bagging machine or a Comcount carton presentation system.

Model	Minimum weight	Maximum weight	Weighpan Volume	Resolution
06/08-15	1 g	150 g	1 Litre	0.1 g
06/08-50	5 g	500 g	1 Litre	0.1 g
06/08-100	10 g	1 Kg	1 Litre	0.2 g

Standard Features

Independently driven fine feed finger with simple adjustment to suit different product sizes.

Specially formed feed trays with polyurethane coating to enhance product flow and reduce noise and wear.

Weighpan wear parts lined with polyethylene to reduce noise and product damage.

Siemens PLC Based Control System which utilises a small remote control unit with Touch Screen Display for simple data entry and display.

Machine settings for 500 different products can be stored and recalled from memory.

Optional Extras

Remote sample scale to enable simple setting of piece weight information when working in count mode.

Complete range of ancillary equipment available including Hoppers, Elevators, Outlet Chutes, Automatic Bagmakers and Carton presentation Systems.
