Model 22 / 23 / 24 Range General Purpose Automatic Weighing and Weigh Counting Machines

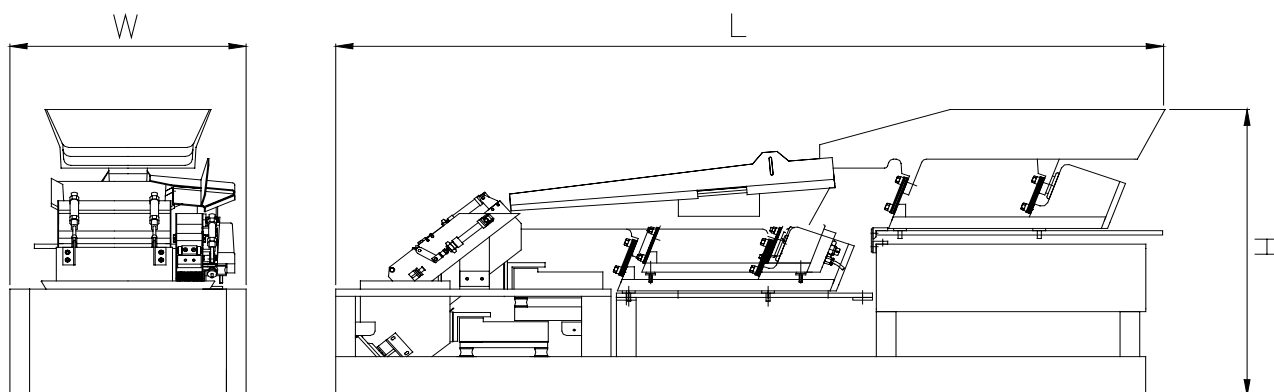

The Comcount Model 22, 23 and 24 Series Linear Weighers are General Purpose machines suitable for Automatic Weighing and Weigh Counting a wide range of Industrial, Technical and Medical Components.

Typical applications range from very small packs of plastic mouldings, electrical items and medical components to larger bulk packs of hardware items such as screws, fasteners, furniture fixings and pressed parts.

The Model 22/23/24 machines are basically identical in operation with the three separate frame sizes each available with a range of alternative weight ranges, hence allowing the machines to be configured to cover the widest possible range of applications.

The machines are controlled by a sophisticated Siemens PLC based control system which utilises a Touch Screen Display for data entry and menu storage of product set up parameters.

The machines are extremely flexible and accurate and are suitable for operation as either a stand-alone unit, in conjunction with a range of Automatic Bagmakers or with a Comcount automatic carton presentation system.

	L	W	H	Weighpan Volume
Model 22	1700 mm	390 mm	590 mm	3 Litres
Model 23	1700 mm	480 mm	620 mm	4 / 8 Litres
Model 24	1700 mm	550 mm	700 mm	12 Litres

Model	Minimum weight	Maximum weight	Resolution
22/23-1.5	50 g	1.5 Kg	0.2 g
22/23-3.0	50 g	3 Kg	0.5 g
23/24-7.0	100 g	7 Kg	1 g
24-15.0	200 g	15 Kg	2 g

Standard Features

Siemens PLC based control system with Touch Screen Display to enable weighing or weigh counting of products which have regular piece weights.

Machine settings for 500 different products can be stored and recalled instantly from memory.

Independently driven fine feed finger with simple adjustment to suit different product sizes.

Specially formed feed trays with polyurethane coating to enhance product flow and reduce noise.

Weighpan wear parts lined with polyethylene to reduce noise and product damage.

Auto zero and underweight recall facilities incorporated as standard.

Optional Extras

Complete range of ancillary equipment available including Remote Sample Scales, Hoppers, Bin Lifters, Elevators, Outlet Chutes, Automatic Bagmakers and Carton presentation Systems.

Model 26/28/32 Range Double Head Machines available for higher speed applications.
