Model 26 / 28 / 32 Range Twin Head Automatic Weighing and Weigh Counting Machines

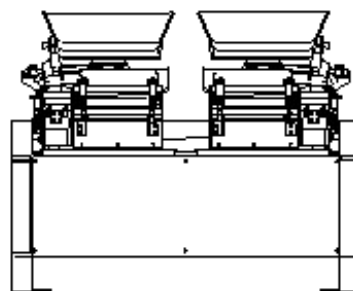

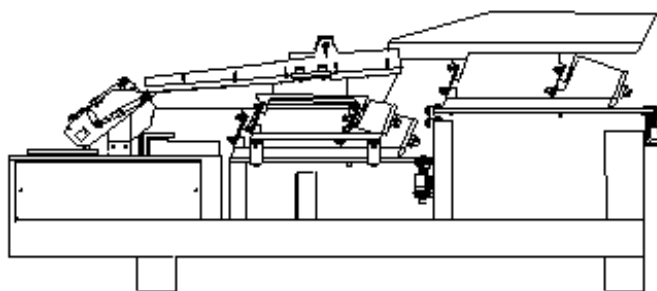

The Comcount Model 26, 28 and 32 Series Twin Head Linear Weighers are general purpose machines suitable for automatic weighing and weigh counting a wide range of industrial, technical, medical and plastic components.

Typical applications range from small packs of plastic mouldings, electrical items, medical devices etc. to larger bulk packs of hardware items such as screws, fasteners, furniture fixings and pressed parts etc.

The machine features two completely independent feed systems and weigh heads housed in a common framework with an integrated Siemens control system with touch screen display.

The Model 26/28/32 machines are basically identical in operation with the three separate machine sizes each available with a range of alternative weight ranges hence allowing the machines to be configured to cover the widest possible range of applications.

The machines are extremely flexible and accurate and are suitable for higher speed applications in combination with an Automatic Bagging Machine or with a Comcount automatic carton presentation system.

Model	L	W	H	Weighpan Volume
26	1700 mm	700 mm	600 mm	3 Litres
28	1700 mm	900 mm	770 mm	4 / 8 Litres
32	1970 mm	1180 mm	810 mm	15 Litres

Model	Minimum weight	Maximum weight	Resolution
26/28-1.5	50 g	*1.5 Kg	0.2 g
26/28-3.0	50 g	*3 Kg	0.5 g
28/32-7.0	100 g	*7 Kg	1 g
28/32-15	200 g	*15 Kg	2 g

*Single Discharge, x 2 for Double Discharge

Standard Features

Siemens PLC based control system with Touch Screen Display to enable weighing or weighcounting pre-set counts of products which have regular pieceweights.

Machine settings for 500 different products can be stored and recalled instantly from memory.

Independently driven fine feed finger with simple adjustment to suit different product sizes.

Specially formed feed trays with polyurethane coating to enhance product flow and reduce noise.

Weighpan and wear parts lined with polyethylene to reduce noise and product damage.

Bulk Catchment system to accumulate product when fine feed operating to increase speed and accuracy.

Optional Extras

Complete range of ancillary equipment available including Remote Sample Scale, Infeed Distribution System, Hoppers, Elevators, Outlet Chutes, Automatic Bagmakers and Carton presentation Systems.
